

STUDDED T POST

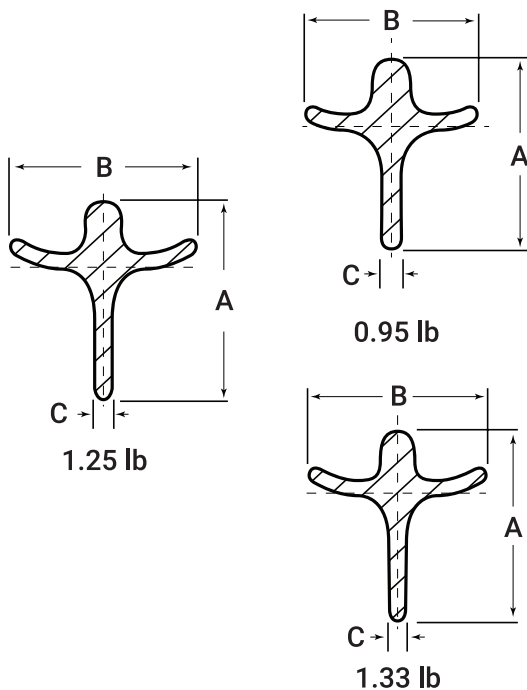

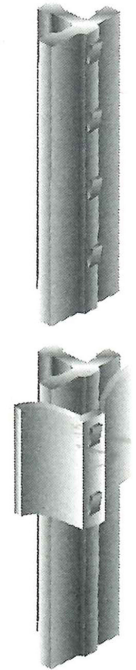

- Made from 100% high-quality recycled rail steel
- Lightweight and long-lasting
- Easy to install, no digging required

We have been making T Posts in the middle of steel country since 1901. Our T Posts are made with some of the most durable stuff known to man. Rail steel was made to carry the load of a freight train. If it can hold up a train, it can hold up your fence.

- Made from 100% high quality recycled rail steel
- Lightweight and long-lasting
- Easy to install, no digging required
- Stands up to livestock
- A good choice for rocky or hard ground
- Can also be used for pens, sign posts, property markers, guide stakes, vineyard trellises, or home gardens

- Good for wire, chain link, wire mesh, silt fencing, snow fencing, and safety fencing
- Removable for temporary use
- Unfinished T Posts are still inherently weather resistant due to the higher quality of rail steel
- Made in the U.S.A.

Material Detail: Posts are produced from standard "T" rails weighing 91 lbs/yd or more according to ASTM A499, Grade 60; or ASTM A702 (1.33 lbs/ft only).

Finish: Posts are either painted with baked enamel, hot dip galvanized per ASTM A123, or unfinished.

Studded "T" Posts: The weight of each post is 0.95, 1.25, or 1.33 lbs/ft. Studs are spaced uniformly along the length of the "T" shaped post.

Anchor Plates: Standard on 1.25 and 1.33 lbs/ft Studded T Posts, securely swaged on the studs. Not available on 0.95 lbs/ft T Posts.

Wire Fasteners: Five pre-formed wire fasteners are included with each painted T Post.

Bundling: Painted posts are banded in 5 piece subbundles in 200 piece master bundles, on blocking.

Studded T Post Properties				
Weight	Dimensions (Nominal)			Area
Lbs/ft	"A"	"B"	"C"	Inch ²
.95	1.465	1.125	0.125	0.279
1.25	1.625	1.375	0.125	0.368
1.33	1.635	1.375	0.130	0.391
