Objectives

As someone with extensive experience reading blueprints, working with machinery, steel, and concrete, running heavy equipment such as backhoes, bulldozers, rollers, excavators, and cranes, using hand and power tools, knowledge and experience welding stick, mig, and tig, accomplished in residential and commercial construction and HVAC, I am currently seeking a position that will put my skills to use as well as expand my knowledge of the construction, maintenance, and HVAC fields. My experience as a construction foreman and maintenance technician as well as my education and credentials in HVAC give me the ability to fulfill all duties in any position involving heating, ventilation and air conditioning installation and repair, property upkeep, residential home repair and all aspects of construction on commercial and residential job sites. My willingness to work in any open positions gives me the flexibility to be a valuable member of your construction or repair crew. My education and involvement in leadership roles will allow me the potential to grow within your company and assist others who may need help understanding or completing necessary tasks involved in any project.

Professional Experience

January 2006 - Present | Owner & Operator

Warner Heating & Air Conditioning and Home Repair | 424 W Cunningham St, Butler, PA
Owned my own company completing the day to day tasks associated with HVAC. Employed a small group of people when necessary on larger jobs while completing the average jobs on my own. Decided to look into employment in an industrial setting when business was not fast paced enough to satisfy my own income needs to support my growing family while keeping my own business open to do side jobs that will work with the schedule I pick up with an outside company.

April 2004 – January 2006 | Carpenter Foreman

FireDex of Butler | 9133 Marshall Road, Cranberry Township, PA
Fire, wind and water restoration included going into damaged residential homes, removal of damaged material, rebuilding homes by reading blueprints, ensuring my crew had and used the necessary skills to reconstruct residential homes damaged by fire.

October 2003 – April 2004 | Salesman

Wright Pontiac of Wexford | 11015 Perry Highway, Wexford, PA
Gained knowledge of each model of car on the lot, acquired computer skills necessary to navigate inventory, used customer service skills to ensure satisfaction of purchases, continued automobile education to become the top salesman in the company.

1998 - 2003 | Foreman of Steel Erection

Warner & Warner | 124 Nagy Road, Hilliard, PA
As foreman, I read blueprints, set steel using a crane, held responsibility of entire crew to ensure exact placement of materials for proper building erection, walked rafters with crew members to set purlins in correct position to keep rafters straight to ensure proper alignment of roof.

Key Skills

- Accomplished in all aspects of construction including drywall installation, carpentry, plumbing, electrical, demolition, roofing, masonry, brick laying, painting, pipefitting, metal working, as well as other aspects involved in general contracting.
